

Raymond Recorder

VOLUME 36

FRIDAY OCTOBER 15th 1943

NUMBER 26

Funeral Services For Mrs. Ernest Organ

Funeral services for Mrs. Sarah Organ, 54 years, who passed away in the Lethbridge Hospital Thursday night after an illness of six months, were held in the Raymond 2nd Ward Chapel Sunday, October 10th, at 2 p.m. with Bishop L. L. Palmer in charge. There was a large crowd present and a lovely array of floral offerings from the many friends of the family.

The Choir, under the direction of Delbert Oler sang "Abide with Me" "Thou Deepening Trials" and "I Need Thee Every Hour." A vocal duet by T. K. Roberts and his daughter Beth "What a Friend We Have In Jesus" was sung as a special number.

The opening prayer was offered by C. R. Wing of the 1st Ward Bishopric, and the benediction was pronounced by Elder J. W. Evans.

The first speaker was Elder Geo. E. Court who spoke of his acquaintance with the family over many years, and extolled the virtues of deceased as a loving wife and mother, ever anxious for the welfare of her family. He spoke of the promises of the resurrection and eternal life, and said there was a great deal of comfort for everyone in the hope of the future.

Elder Lee Brewerton spoke next and voiced his appreciation of the friendship and acquaintance of the deceased and her fine family. Life held different experiences for all of us to teach the lessons that were essential for us to receive. He spoke of the plan of salvation and offered comfort and encouragement to the bereaved in their sorrow.

Elder W. C. Stone, who had been acquainted with the family for many years spoke from the scriptures on the reality of the resurrection and life after death, and said that while there was sorrow at death and the parting with our loved ones, there was hope in the future and the reuniting of the family circle.

Stake Pres. T. Geo. Wood voiced his sympathy for the family in the loss of wife and mother. It was very hard to part with those we love so dearly, but there was great hope of a life hereafter where sorrow and sadness would have no place. He expressed his appreciation on behalf of the Sugar company for the dependability and loyalty of the sorrowing husband, who had been an employee of the company for a great many years.

Bishop Palmer expressed his sympathy to the family in their loss and on behalf of them, thanked all who had so kindly assisted in every way during the sickness and death of Mrs. Organ.

A large cortege followed the remains to the cemetery where interment was made with Christensen Bros. in charge.

With the many friends of the family we extend our deepest sympathy to the husband and family in their bereavement.

With butterfat at 54c. per lb. you can barely afford not to take your milk to the local Cheese Factory. Phone the Factory and have yours picked up.

Miss Rowena McMullin has just graduated from her months basic training along with seventy four other girls from different part of Canada.

IMPORTANT NOTICE

Announcement has been made for the following demonstration relative to the VICTORY LOAN DRIVE

On Sunday afternoon at 2:30 all Victory Loan Officials are requested to be at the Capitol Theatre for a Motion Picture demonstration, and to learn of the Victory Loan details. This is IMPORTANT and all those connected with the loan must be on hand at 2:30 p.m. This will be out in time for the Sunset Service at the Cenotaph.

Sunday afternoon at about 4:30 p.m. a Sunset Service will be held at the Cenotaph when the Choirs of both Wards will render patriotic songs. Two short talks will be made on the Subject, "Why I Buy Victory Bonds." This will be followed by a Flag raising Ceremony, to be followed by additional musical selections and being concluded by our National Anthem.

On Tuesday next at 8:30 p.m. a Monster Road Show with a company of 40 people will present a 2 hour show in the Opera House. This will be highlighted by the appearance of the Macleod Air Force Band. It will be an entertainment long to be remembered, and will be the same program that is being held in Lethbridge and Calgary.

Arrangements have been made to dismiss the M.I.A. meetings somewhat earlier in order that this Gala Rally can be attended.

Fires were in demand Tuesday when the weather was considerably cooler and a little artificial heat was almost a necessity in stores and offices.

The interior of the Treasury Branch was altered over the week end and has made a great improvement in its appearance. The work has been completed after hours during this week.

Efficient Use Of Beet By-Products

E. J. Maynard the outstanding authority in the nutritive value of beet by-products delivered an address at the Feeders' Day in Lethbridge last January. It was so impressive and the information so applicable to the beet growing areas that I am presenting it here in part.

"Beet factory by-products include the beet tops, beet pulp and molasses. All of these feeds are well adapted for the use with grain and alfalfa hay in feeding dairy cattle, beef cattle and sheep, and at present market prices can very materially reduce the feeding costs of producing meat, milk and wool in the areas near the sugar factories.

It is a surprising fact however, that for many years and even in many cases today much of the potential feeding value in these by-products and especially in beet tops has been lost because they have not been served properly or used to the best advantage in the livestock ration.

If the beet growers generally could appreciate the fact that it is possible to double the feeding value of their beet by-products by using sufficient phosphorus in their rations and if they could realize that approximately 62 p.c. of the entire fattening value of their beet by-products is contained in the tops at harvest time, they would take steps no doubt to adjust their feeding operations to take advantage of this knowledge in the future. These are the two main points that beet growers should have in mind if they want to make the most of their available supply of beet products: first that all beet by-products are sadly deficient in phosphorus and will only return full feeding value if fed in a phosphorus sufficient ration;

and second that the beet tops if properly conserved represent by far the greatest portion of feeding value in all the by-products and consequently deserve more attention in the matter of harvest and conservation than they have often had up to the present.

The dry matter produced in the tops from a ton of beets is approximately 10 p.c. of the weight of the beets and contains 60 p.c. of the total digestible nutrients, i.e., 200 pounds of dry tops provide 120 pounds of digestible nutrient, an amount equivalent to that supplied by 152.4 pounds of barley. In other words the tops alone from an acre of 12.4 ton beets have a feeding value equal to 1890 pounds of barley. With barley priced at \$1 per cwt. this would mean that the beet tops from the average acre of beets are worth \$18.90. Yet because of improper care and lack of appreciation for their true feeding value these tops are often sold for only \$3.00 to \$4.00 per acre.

The same acre of beets provides about 53.4 pounds of digestible nutrient in the wet pulp and about 20.9 pounds in the molasses.

Now regarding the importance of providing sufficient phosphorus in beet by-product rations. All beet by-products and alfalfa are low in phosphorus as wheat, bran, cotton seed cake, bone meal, barley and oats. When sufficient grain is fed in the ration, 1 pound daily to lambs and 10 pounds daily to cattle, there is generally no need for additional phosphorus in the ration to make maximum gains, but during the early part of the feeding period when animals are fed largely on beet by-products with little or no grain, some phosphorus is essential.

At the Idaho Experimental

Local Beet Harvest Nearing Completion

Taking full advantage of the time. While tonnage is a little long spell of fine weather, farm disappointing, due to the dry harvest, until the end of this season, the sugar content is week will see the job about 80 325,000 or 330,000 tons are all p.c. completed, the Factory of-processed, Southern Alberta will fice having received reports of have reached a new high in the 230,000 tons delivered to receive total pounds of sugar manufactured. As the deliveries of beets slackens off, the beet receiving crews are being pared down to meet the needs, a few smoothly and steadily and new already having been released.

IMPORTANT

All parents or relatives who have boys or girls in the Services please arrange to bring their pictures to the Recorder Office or Brewerton's Store. These will be used by the Publicity Department of the Victory Loan Drive and will be returned to you after the Drive is over. Please do this at once and it can be assured that they will be well taken care of. Do it today please.

Station cattle fed on wet pulp, molasses, and alfalfa gained 1 pound per day while cattle fed the same with 1-10 pound of bone meal added gained 2 pounds per head daily. At the Utah Experiment Station cattle fed on beet pulp, molasses and alfalfa gained 1.5 pounds daily while cattle fed the same ration with 1-10 pounds of bone meal added gained 2.65 pounds. Similar results have been obtained with both organic and inorganic phosphorus (bone meal and mono-calcium phosphate).

In order to properly conserve the feeding value of tops, they should be either gathered into small piles in the field to be quickly dried, cured, and then stacked in the same manner as hay or else they should be gathered as green and as clean as possible and stacked to produce beet top silage. By attaching the pick-up of a combine to a beet loader it has been possible to pick up green tops free from dirt and load them into a sling of woven wire to be quickly unloaded at the stack. Stacks of beet top silage are made of tops alone, 12 to 14 feet wide on well-drained ground adjacent to the feed yard. They are made of suitable length by adding successive layers of green tops which are allowed to ferment and settle until a height of from 5 to 7 feet of settled silage is obtained.

Standard beet by-product ration for cattle:

40 to 60 lbs. wet pulp
5 to 8 lbs. wheat or barley
6 to 10 lbs. alfalfa
6 to 8 lbs. of dry matter in tops

For lambs:

2 to 3 pounds molasses
4 to 8 lbs. wet beet pulp
1 to 1.5 lbs. grain
.6 to .8 pounds of dry matter in tops
1 to 1.5 lbs. alfalfa

While conditions may require the feeding of tops alone in the fall their highest feeding value will be secured if they are fed in conjunction with other feeds beet tops properly conserved and fed to not cause indigestion or disease. If they are left out in the field however, and fed in a frozen condition with snow or ice bad results can of course be expected.

A complete copy of the address may be obtained from the Office of the District Agriculturist, Court House, Lethbridge.

W. R. HANSON
District Agriculturist

Both factories are running records for slicing are being made. The beets seem to be easy to slice and process, compared to some years, and with the improved methods of processing the juices, the operations all through are speeded up somewhat.

Prices on some grades of eggs went up 5c. a dozen this week, some others 2c. This is a source of joy to poultry owners, coming as it does just as the pullets are coming into production and the year old hens just getting over their moult.

Thanksgiving was observed very quietly in Raymond, the chickens and turkeys getting the worst of the deal as usual furnishing the meat for the dinner.

School Opens For Fall Term

Raymond's schools opened for the year on Tuesday, this week, after the long vacation. Attendance at the High School was rather small, due to many of the boys in the higher grades being still busy at work assisting in the beet harvest and at various jobs. The Public School, however, had a heavy enrolment of old and new student totalling 501, which makes an average of just under 36 students each for the 14 teachers engaged there. There is a complete double room school of all grades from 1 to 6, and a mixed grade 1 and 4 to handle the enrollment. Members of the School Board were present to assist the teachers in getting the children into the various rooms and ready for actual work to start Wednesday morning. Following are the teachers in the schools:

High School: Lyman H. Jacobs Principal; M. T. King, H. Dean Rolfsen, Mrs. H. Dean Rolfsen, Milo C. Vance, L. L. Harker and Mrs. Beth Shortliffe.
Public School: J. Orvin Hicken, Principal and Grade VII Grades 6,

Reece Gibb and J. L. Gibb, Mrs. Martha Wolley and Mrs. Eleanor Hudson, Grades 5.
Misses W. C. McIntyre and Phyllis Redd, Grades 4.
Mrs. Alda Gibb & Mrs. Sarah Low, Grades 3.

Misses Gladys James and Hazel Redd, Grades 2.
Mrs. Doris Jensen and Miss Norma Smith, Grades 1.
Miss Eleanor Stutz, Grades 4 and 1, mixed.

On Tuesday afternoon the local School Board met with Dr. W. H. Swift, Chief Inspector of Schools, and A. B. Evanson Local District Superintendent, to discuss van service, and the transportation of the students to and from the schools and associated questions, and also the question of the education and costs of same for the transient Japanese children.

S. I. MAY Editor.

THE JOB AHEAD OF US ON THE FIFTH VICTORY LOAN

The war has now entered its fifth year. Today, we are on the march. Our soldiers, our sailors, our airmen—the military strength of the United Nations—mighty in number and equipment—are attacking on all fronts.

The Hun has been chased from North Africa. Mussolini is gone, and Italian resistance is crumbling. Our Russian allies are slowly smashing back the German armies. Our air forces are blasting Germany with huge

bombing raids, preparing the way for an all-out land assault on Hitler's fortress. On the Atlantic, the battle against the subs is running in our favour. And, in the Far East, Japanese aggression has been halted, with our offensive in this region gradually gaining in size and momentum.

We are all aware of these facts—they are the news of the moment. But, we also know the toughest part of the battle still lies ahead. Our progress on world battlefronts gives us fresh spirit to press onward to our goal—but our advances up to now are only a start. It is going to take a lot of hard and bloody fighting to completely defeat Germany and Japan—to smash their still powerful military forces, and make them willing to accept our terms of "unconditional surrender."

To bring this war to a victorious end, we must have—and we must maintain—overwhelming superiority in men and equipment. We must continue our war effort—on the home front as on the battle front—

with the same purpose and determination which carried us through the anxieties and reverses of the last four years. The slogan of Canada's Fifth Victory Loan is "Speed the Victory." Each of the four previous Victory Loans has been a great success. The Fifth Victory Loan must be an even greater success—it must be another milestone in our march to Victory.

It's your job to "Speed the Victory" by selling more Bonds to more people than ever before.

P. T. Rogers, President of the B.C. Sugar Refining Co. was a visitor at the local plant of the company the first part of the week.

When a farmer purchases a cow he is, in effect, gambling that one animal against his entire herd, say veterinary authorities, unless before being placed with the other animals the cow has been tested by a veterinarian to ensure that it is not a disease carrier.

FARM FOR VICTORY SHEEP RAISING PROBLEMS

One of the greatest problems in sheep-raising is to avoid losses due to disease, or, in other words, keeping the flock healthy. Too many people take the attitude that sheep will die regardless of what may be done, and therefore they accept losses as a matter of course. It is true that treating diseased sheep effectively is difficult. However, prevention of disease can and should be carefully practiced in every flock.

A natural resistance to disease and parasites is the farmer's best ally. The best preventive method of fighting disease is to keep this natural resistance high. Animals in strong vigorous condition receiving all the required nutrients resist the attack of disease and parasites to a high degree. On the other hand a weak, run-down sheep becomes a prey to any germs or parasite eggs to which it may be exposed.

In most districts sheep suffer from a deficiency of minerals, especially phosphorous, iodine, and sometimes calcium.

IN THE ESTATE OF WALTER MUNROE SMITH, late of Raymond in the Province of Alberta, Farmer, Deceased

NOTICE is hereby given that all persons having claims upon the estate of the above named WALTER MUNROE SMITH, who died on the 22nd day of March, A. D. 1922, are required to file with the undersigned Solicitor by the 15th day of November, A.D. 1943, a full statement duly verified, of their claims and of any security held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to his knowledge.

DATED this 4th day of October A. D. 1943

WARREN L. JONES
Raymond, Alberta
Solicitor for Clarence B. Smith,
Administrator

Two suitable mixtures appear below.

Monocalcium phosphate	15 lbs.
Ground Limestone	51 lbs.
Salt	34 lbs.
Potassium Iodide	3 ozs.
Or	
Bonemeal	67 lbs.
Salt	33 lbs.
Potassium iodide	3 oz.

Mix the first two ingredients, then dissolve the iodide in a small amount of water and sprinkle it over the mixture. In districts where copper is deficient, 4 ounces of copper sulphate may be well mixed with the other minerals.

Besides building up the resistance of sheep, farmers should reduce the germs and worm eggs to which the sheep become exposed. This can best be done by keeping sanitary buildings, yards and pastures. By rotating, pasture stomach worms can often be prevented. In case the flock is infested they should be treated. Phenothiazine has been found very satisfactory for treating sheep for internal parasites. Tablets of this drug may be obtained from local drug stores or from the Wool Growers' Association, Lethbridge. Stomach worms and other internal parasites have been found to be so prevalent in Alberta flocks that the following treatment is recommended for every flock in early spring:-

1. Give each sheep, including the ram, the following dose:-
(a) Up to 100 lbs. 3 compound tablets.
(b) Over 100 lbs. 4 compound tablets.

2. In summer and autumn, any flocks showing scouring should be treated at first sign of the diarrhoea in young animals. Lambs receive 2 compound tablets.

Among the commonest insect pests are sheep ticks (keds). Sheep ticks and lice suck blood and annoy the sheep, causing considerable loss in gains. They also cause broken and soiled wool. External parasites can be controlled by dipping. Every flock should be dipped at least once a year.

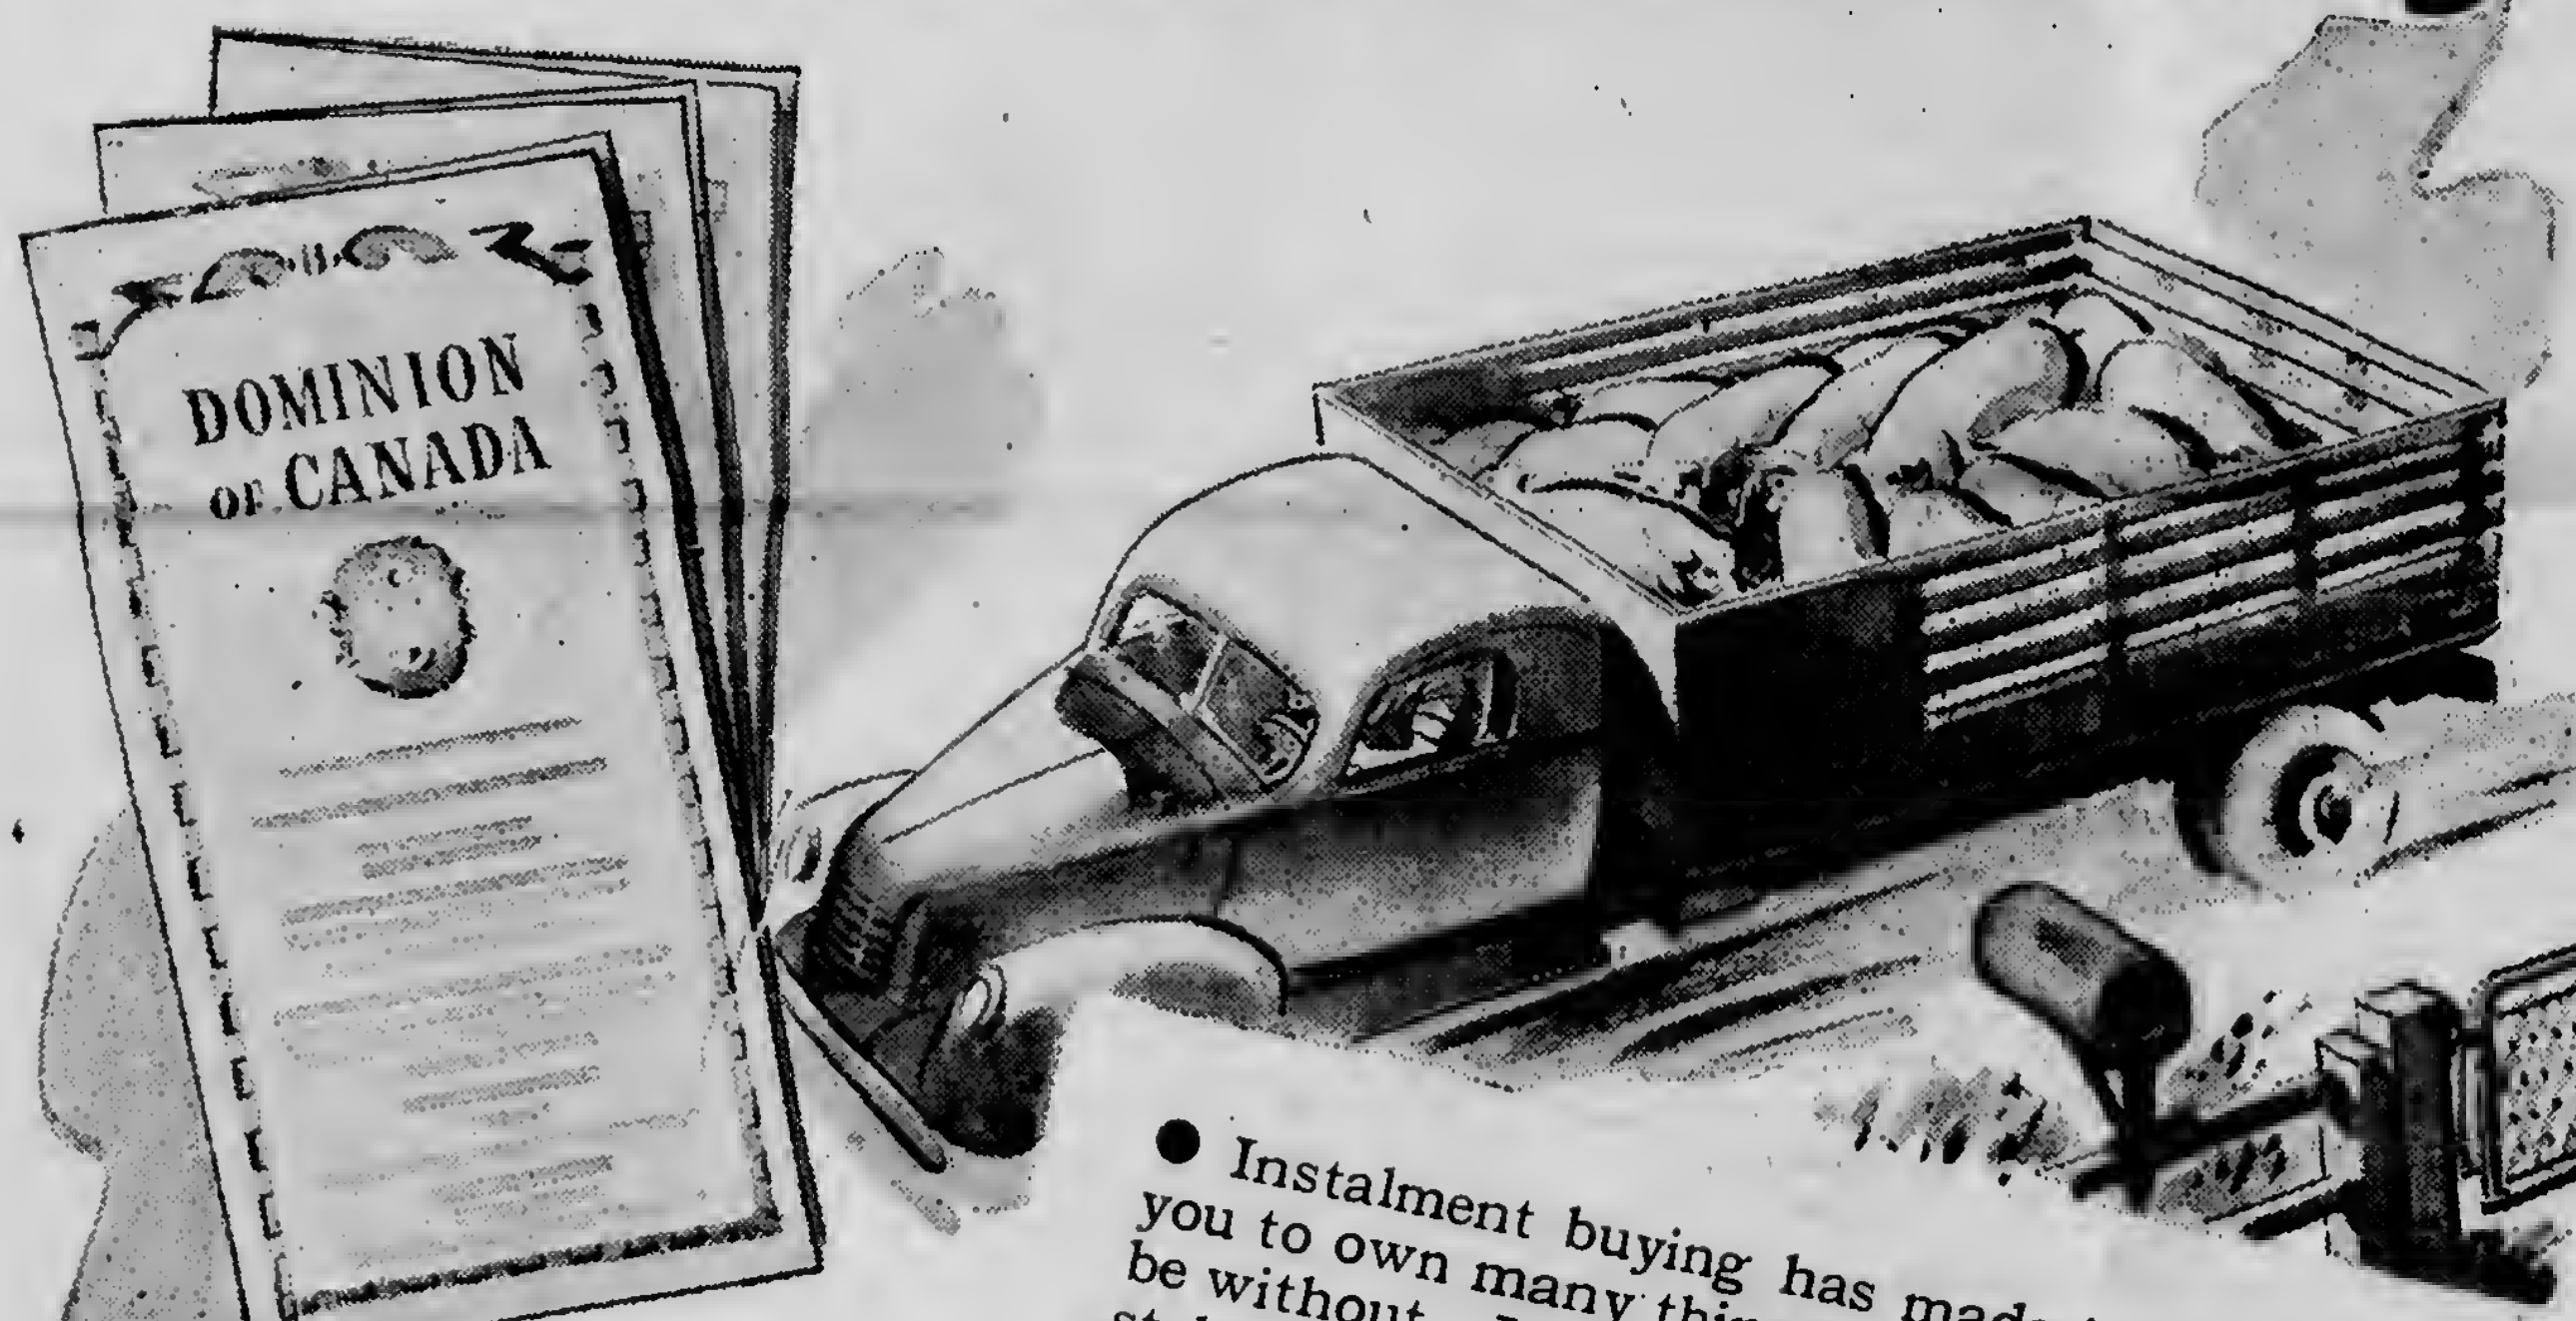

Bulletins and leaflets giving complete instructions for prevention and control of common disease and parasites of sheep can be obtained by writing to or calling at the office of the District Agriculturist, Cardston. One bulletin contains a plan for a dipping vat.

In the study of the life history of the apple maggot, it has been found that cultivation tends to increase the number of adults which emerge from the soil. Frequent rains during the emergence period have a like result and also tend to prolong the life and activity of the adults.

An opportunity to **SAVE** money ... the convenient way

● Instalment buying has made it possible for you to own many things you would otherwise be without. It's easy to pay for things the instalment way... by paying as you earn. It's just as easy to save... when you save the instalment way. Ever try it? Now is your opportunity to do so. Save the instalment way by putting money... as you get it... into Victory Bonds. When you arrange to buy Victory Bonds on the instalment plan you undertake an obligation to yourself to save money regularly. ...and you fulfill an obligation to your country. You help to win the war... help to speed victory and peace. Plan to buy all the Victory Bonds you can this easy, convenient way... by saving money regularly. Any bank will arrange to get Victory Bonds for you, and you can pay for them during the next months in instalments convenient to you.

WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the face value of the Bond on the date of maturity with half-yearly interest until that time. A Victory Bond is the safest investment in Canada backed by the entire resources of the Dominion. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest when due. A Victory Bond is an asset readily marketable at any time.

vince, the government has placed 1,479 purebred bulls and 1,144 purebred boars in every section of Alberta. The Minister reminded his hearers that in 1942, Alberta farmers led all provinces in Canada in the marketing of hogs with a total of 2,182,342 animals. He said that indications for 1943 were that this record would be exceeded.

Dealing with the poultry industry, Mr. MacMillan placed its value in 1942 at fifteen million dollars and predicted an increase of three million during the current year. Three and one-half million chicks were sold by Alberta poultrymen in the 1943 season.

Shifts changed at the Sugar Factory Sunday when two shifts came back with only an eight hours break between shifts.

HOW MILK SUBSIDIES ARE ALLOCATED

With further reference to the application of subsidies for the production of dairy products, as announced recently by Hon. James G. Gardiner, Minister of Agriculture, and administered by the Agricultural Food Board, the Board has made the following explanatory statement.

"The Board is authorized to apply the subsidy of fifty-five cents per hundred pounds on milk for fluid consumption in all areas where such subsidy is considered necessary to maintain production. In other areas where the previous rate of subsidy, viz. twenty-five cents per hundred pounds, is considered adequate this subsidy will apply. The subsidy of thirty cents per hundred pounds for milk which is concentrated will be extended to apply on milk used in the manufacture of skim milk powder provided that the milk or butterfat is not otherwise subsidized. The granting of such subsidies will be considered on receipt of recommendations from Provincial Milk Boards or Commissions.

FARM PROBLEMS

Farm policies in Alberta were discussed in a recent radio broadcast by Hon. D. B. MacMillan, Minister of Agriculture. Stating that probably 90 per cent of the food on our tables comes from Alberta farms, Mr. MacMillan said that agriculture "finds itself prepared to increase and improve production" for the war. He added that in an effort to improve the quality of livestock in the Province, the government has placed 1,479 purebred bulls and 1,144 purebred boars in every section of Alberta. The Minister reminded his hearers that in 1942, Alberta farmers led all provinces in Canada in the marketing of hogs with a total of 2,182,342 animals. He said that indications for 1943 were that this record would be exceeded.

"In the case of milk manufactured into cheddar cheese for which a subsidy of thirty cents per hundred pounds is provided, application should be made by the management of the cheese factory on forms supplied for the purpose and sent to all cheese factories.

"Under authorization granted to the Agricultural Food Board, distributors and manufacturers of milk or milk products are required to obtain permission from the Agricultural Food Board before purchasing milk or cream from producers other than those from whom they were obtaining supplies at the date the Order became effective, which was September 9th."

For agricultural purposes, such as ditching, land clearing, drainage, irrigation, and stump blasting, about 5,000,000 lbs. of dynamite are used in the United States every year.

5TH

VICTORY LOAN

Raymond Co-operative

Cheese Factory Association Limited

The Minister of Finance of the Dominion of Canada offers for public subscription

\$1,200,000,000

Fifth

VICTORY LOAN

Dated and bearing interest from 1st November 1943, and offered in two maturities, the choice of which is optional with the subscriber, as follows:

15 years and 2 months
3% Bonds
Due 1st January 1959

Callable in or after 1956
Interest payable 1st January and July
Bearer denominations,
\$50, \$100, \$500, \$1,000, \$5,000, \$25,000

Issue Price: 100%

3 years and 6 months
1 3/4% Bonds
Due 1st May 1947

Non-callable to maturity
Interest payable 1st May and November
Bearer denominations,
\$1,000, \$5,000, \$25,000, \$100,000

Issue Price: 100%

Principal and interest payable in lawful money of Canada; the principal at any agency of the Bank of Canada and the interest semi-annually, without charge, at any branch in Canada of any Chartered Bank, excepting that the first interest payment on the 3% Bonds will be for an eight months' period and payable 1st July 1944.

Bonds may be registered as to principal or as to principal and interest, as detailed in the Official Prospectus, through any agency of the Bank of Canada.

Fully-Paid Subscriptions—Subscriptions for either or both maturities of the loan may be paid in full while the lists are open at the issue price in each case without accrued interest. Bearer bonds with coupons will be available for prompt delivery.

Instalment Subscriptions—Subscriptions may also be made payable by instalments, plus accrued interest, as follows—10% on application; 18% on 1st December 1943; 18% on 3rd January 1944; 18% on 1st February 1944; 18% on 1st March 1944; 18.64% on the 3% bonds or 18.37% on the 1 3/4% bonds, on 1st April 1944.

The last payment on 1st April 1944, covers the final payment of principal, plus .64 of 1% in the case of the 3% bonds and .37 of 1% in the case of the 1 3/4% bonds representing accrued interest to the due dates of the respective instalments.

Conversion Offer—Holders of Dominion of Canada 5% Bonds due 15th October 1943 and Dominion of Canada 4% Bonds due 15th October 1945 (the latter issue called for payment at 100% on 15th October 1943), who have not presented their bonds for payment, may, while the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like or greater par value of bonds of one or both maturities of this loan at the issue price in each case. The surrender value of the 5% and/or the 4% bonds will be 100.125% of their parvalue, the resulting adjustment to be paid in cash.

The Minister of Finance reserves the right to accept or to allot the whole or any part of the amount of this loan subscribed for cash for either or both maturities if total subscriptions are in excess of \$1,200,000,000.

The cash proceeds of this loan will be used by the Government to finance expenditures for war purposes.

Subscriptions may be made through any Victory Loan Salesman, the National War Finance Committee or any representative thereof, any branch in Canada of any Chartered Bank, or any authorized Savings Bank, Trust or Loan Company, from whom may be obtained application forms and copies of the Official Prospectus containing complete details of the loan.

The lists will open on 18th October 1943, and will close on or about 6th November 1943, with or without notice, at the discretion of the Minister of Finance.

L. J. Mehew Injured

While working on one of Ralph Bros. teams last Saturday, Jack Mehew, local blacksmith, was dragged by the horses and ran over by the wagon, resulting in six ribs broken, two with a compound fracture and a punctured lung. Casey Ralph, who was in the wagon when the team bolted was thrown over the front of the box and scratched and bruised, but had no bones broken.

The team was pulled up in front of the Mehew shop to have the shoes tightened and the tugs of the one horse dropped, the other horse being hitched to the wagon and the neckyoke on the tongue. Casey was holding the lines while Jack was working. Something startled the team and they bolted, dropping the tongue of the wagon and pulling it over Jack. They described a circle and the tongue ran under the front bumper of a parked truck and when it stopped with a jerk, Casey was pitched over the front of the wagon and on to the doubetrees and bumper of the truck, being scratched and bruised.

Jack was rushed to the Lethbridge Hospital and Xrays showed the injuries mentioned above. He is resting as well as can be expected now.

Say it with Bombs to Hitler and Tojo. Buy more bonds, certificates and stamps and really speed the victory.

Most of the local Air Cadets participated in the Airshow and Carnival at No. 8 B and G school last Saturday afternoon.

A great many Raymond people were in Lethbridge Saturday to see what they could of the Parade, Carnival and dance. The crowd was stupendous and many contented themselves with watching the Airshow and then returning home again.

NOTICE

A special meeting was held by the Canadian Legion of Raymond to discuss the subject of Xmas parcels for all those in the Service. It was decided that it would be carried out with the support of the people of Raymond, and it was suggested that the Addresses and names of all who are in the Service be dropped in the various boxes that are in Town for this purpose. This is very IMPOTANT so Mothers, Fathers, Sisters, brothers, sweethearts and friends and relatives be ure and drop the address of these persons who are in your family in one of these boxes. For all Overseas the deadline date is October 28th so please arrange to take this responsibility and do it now.

BREWERTON'S

FARMERS AND FARM WORKERS

If Your Farm Work has Slackened for the Winter, You Are Needed Elsewhere in Essential Employment

Highly essential work—very important in Canada's war effort and for the welfare of the Nation—is threatened with shortages of workers. One of the few sources of men available for other high priority jobs is those men on the farm who will not be needed at home during the Fall and Winter. Heavy needs must be met in many lines—producing vitally essential forest products; in base metal and coal mining, in food processing, in railway track maintenance. If you live on a farm and are not needed at home during the Fall and Winter, you are urged to answer this national appeal.

Farmers engaged in essential work during the off season will be allowed to return home when needed. Also, those on postponement under Mobilization Regulations will continue on postponement while in approved essential work during the slack season on the farm.

Please answer this vital call NOW.
